

Instruction

The 4-channel switch module is designed for building and home automation. It supports switching control, timing, scene logic, safety functions, and staircase lighting. It provides reliable relay output and is widely used for lighting, valves, and equipment control.

4-Channel 16A Switch Module

Key Features

- Support the manual operation of turn on/off the switch
- Support logic functions: AND, OR, XOR, gate function
- Supports configurable scene functionality
- Long electrical/mechanical lifespan ensure stable operation.
- Relay state retention after bus power failure & recovery
- Designed for easy installation on standard 35mm DIN rails.

Physical

- Model Number: SH-KAWB-LCM402
- Power Supply: DC 21V-30V
- Output: 4 Channels
- Output Rated Voltage: 250/440V AC (50/60Hz)
- Output Rated Current: 16A
- Connections: EIB/KNX
- Installation: 35mm DIN Rail Mounting
- Dimension: 72 x 90 x 64 mm
- Weight: 0.24kg
- Working Temperature: -5°C to +45°C
- Storage Temperature: -25°C to +55°C
- Working Humidity: <93%RH (non-condensing)
